Bintang Ridwan Pribadi

bintangridwan30@gmail.com ❖ (62) 815-7597-1998 ❖ Bandung, Indonesia

Third-year Software Engineering student at Telkom University, specializing in Back End Development. Enthusiastic and experienced in working on various projects, especially in backend system development. Proficient in programming languages and frameworks such as PHP, Go, and Node.js. Able to solve problems effectively, think critically, and create innovative backend solutions. Strong communication skills and solid time management ensure timely project completion and optimal team collaboration.

Skills

- Soft Skills: Analytical Skills, Problem Solving, Good Communication, Time Management, Teamwork, Ability to Accept Criticism and Suggestions, High Curiosity.
- IDEs/Editors: VS Code, JetBrains IDEs, Sublime Text, NetBeans, Code::Blocks.
- API Development: RESTful APIs, OpenAPI (Swagger), JWT authentication, API testing (Postman), and third-party integration.
- Version Control**:** Git (GitHub), branching & merging, pull requests, collaborative workflows, and using GitHub Desktop for repository management and collaboration.
- Project Management Tools: Trello, Jira, Google Calendar, and ClickUp.
- Development Methodologies: SDLC, Agile (Scrum), Design Thinking.
- Programming Languages: JavaScript (ES6+), TypeScript, Go, PHP, HTML5, CSS3.
- Frameworks & Libraries: Node.js, Express.js, Laravel, Vue.js, Bootstrap.
- Design Tools: Figma, Motif.
- Database Management System: MySQL, MariaDB, PostgreSQL, ERD (Entity-Relationship Diagram), database design, and normalization.
- Programming Concepts: Programming Algorithms, Object-Oriented Programming (OOP).

Projects

Web Management GYM **2026**

Front End Developer

- Developed a responsive GYM management platform as part of a collaborative team project.
- Designed and implemented 3 core pages and 5+ supporting pages, delivering complete and functional user journeys.
- Converted high-fidelity designs from Figma into interactive frontend components using HTML, CSS, and Vue.Js and Java Script.
- Integrated with backend systems by consuming RESTful APIs, enabling dynamic content and real-time data handling.
- Applied responsive design principles to ensure optimal performance across devices and screen sizes.
- Technology: Figma, Postman, Git, Java Script, HTML, CSS and Vue Js.
- Github: https://github.com/KolegaProject/chain_fit_web

Web Management PMI Nganjuk **2026**

Backend Developer

- Designed a comprehensive ERD with 12 entities to model and structure complex data relationships.
- Developed and maintained backend functionalities using Laravel in a fullstack (monolithic) application, focusing on business logic and data processing.
- Implemented relational schema design in MySQL, including normalization and relationship constraints.
- Developed backend services with a focus on data integrity, performance optimization, and scalability.
- Technology: Lucidchart, PHP Laravel, and Git.

Yupay Platform Split Bil **2025**

Backend Developer

- Developed a split bill platform to simplify expense sharing among users

- Implemented OCR (Optical Character Recognition) using Python to scan and extract data from receipts
- Built and developed RESTful APIs to handle transaction processing and data management
- Created and maintained API testing and documentation using Postman
- Collaborated with team members to ensure seamless integration between backend services and frontend features
- Technology: TypeScript, Express Js, Python, Postman and Git.
- Github Backend: https://github.com/YuPayy/Yupay-BackEnd
- Github OCR: https://github.com/YuPayy/Yupay-Backend-OCR

Telivery: Food Ordering and Distribution Platform **2025**

Backend Developer

- Engineered backend services for a food delivery platform, supporting ordering and distribution processes
- Designed a comprehensive ERD with 15+ entities to structure and manage complex relational data
- Developed scalable RESTful APIs to handle business logic, transactions, and system operations
- Implemented backend logic for order management, data processing, and workflow automation
- Produced structured API documentation to ensure smooth integration between frontend and backend systems
- Technology: TypeScript, Express Js, Postman, and Git.
- Github: https://github.com/bintangridwanp/telivery-be

Equilife: Platform Designed to Support Healthy Living **2025**

UI/UX

- Conducted in-depth user research through surveys and analysis of scientific journals and articles to understand user behavior and needs.
- Applied Design Thinking methodology to define problems and develop user-centered solutions.
- Designed and iterated low-fidelity wireframes and high-fidelity interactive prototypes to validate design ideas.
- Developed intuitive and visually consistent UI using Figma, enhancing usability and user engagement.
- Collaborated with team members to refine design solutions and ensure alignment with user needs and project goals.
- Technology: Canva, Color Hunt, Google Docs, Google Meet, and Figma.
- Figma: https://bit.ly/figma-equilife

Web TO-DO List **2024**

Full Stack Developer

- A simple and efficient task management web application that stores data in the browser cache. Allowing users to maintain their to-do list. It demonstrates the use of core front-end technologies and browser storage capabilities for an optimal user experience.
- Technology: HTML, CSS, JavaScript, and WebStorm IDE.
- GitHub: https://s.id/A33LJ

Library Management Web **2024**

Full Stack Developer

- A website platform for managing a digital library. Allowing users to add, edit, and remove books. The project showcases dynamic interaction using JavaScript and DOM manipulation, ensuring seamless user interaction with the content.
- Technology: HTML, CSS, JavaScript, and WebStorm IDE.
- GitHub: https://github.com/baek-boop/frontend-playground/tree/main/platform-manajemen-perpustakaan

Web Online Loan Management **2024**

Full Stack Developer

- This web application allows users to manage online loans. It incorporates browser caching for storing loan data and DOM manipulation for a responsive and interactive UI. The project highlights the importance of managing client-side data in financial applications.
- Technology: HTML, CSS, JavaScript dom, WebStorm IDE.
- GitHub: https://github.com/baek-boop/frontend-playground/tree/main/platform-manajemen-pinjaman-online

Web Portfolio **2024**

Full Stack Developer

- A personal portfolio website with multiple pages showcasing projects, skills, and contact information. This project

emphasizes the use of DOM manipulation and front-end design principles to create a polished and professional online portfolio.

- Technology: HTML, CSS, JavaScript dom, WebStorm IDE
- GitHub: https://github.com/baek-boop/frontend-playground/tree/main/simple-portofolio

MyLaundry Dashboard Admin **2024**

Front End Developer

- A comprehensive dashboard for laundry management that includes a history diagram feature for tracking orders and business performance. The project integrates advanced JavaScript, Bootstrap for styling, and uses Postman for testing API endpoints.
- Technology: HTML, CSS, JavaScript dom, WebStorm IDE, Postman, and bootstrap.
- GitHub: https://github.com/bintangridwanp/tampilan-admin-myLaundry

Socrates **2024**

UI/UX

- A new student registration platform developed using a design thinking approach. The project focuses on user-centered design and collaborative workflows using tools like Figma for low-fidelity prototyping, Trello for project management, and Lucidchart for process flow design.
- Technology: Figma, Trello, Jira, Google Docs, Google Meet, lucidchart and Design Thinking.
- Figma: https://bit.ly/figma-sokrates

Nusantara Kita **2024**

UI/UX

- A platform designed using a design thinking framework to bring communities together. The project prioritizes user experience, featuring UI designs created in Figma and managed collaboratively through Trello.
- Technology: Figma, Trello, Google Docs, Design Thinking, and Canva
- Figma: https://bit.ly/figma-surabayaDev

Thrift Cycle **2024**

UI/UX

- An online platform for secondhand shopping, developed using agile methodology (scrum). The project involved collaborative design thinking to create a user-friendly interface, with a focus on sustainability and the circular economy.
- Technology: Figma, Canva, Google Docs, Google Meet, and Design Thinking.
- Figma: https://bit.ly/figma-hackfest

B-Mart **2024**

UI/UX

- A simple e-commerce platform built as part of a team project. Using design thinking to inform the design process, the UI was developed collaboratively in Figma to create a user-friendly online shopping experience.
- Technology: Canva, Google Docs, Google Meet, and Figma.
- Figma: https://bit.ly/figma-Bmart

Experiences

Surabaya Dev **Mar 2023 - Apr 2023**

UI/UX Competition - Finalist

- Achieved finalist placement in the Surabaya Dev UI/UX Competition, showcasing strong design and problem-solving skills.
- Developed an intuitive and user-friendly interface that addressed complex user requirements.
- Collaborated with team members to deliver a polished, high-quality design under tight deadlines.
- Demonstrated a deep understanding of user experience principles, balancing aesthetics and functionality.
- Figma: https://bit.ly/figma-surabayaDev

HackFest 2024 **Dec 2023 - Jan 2024**

Hustler - UI/UX

- Responsible for exploring user needs through a design thinking approach to inform product development.
- Designed effective product strategies and presented optimal solutions to address key challenges.
- Collaborated successfully with a team to create an innovative mobile platform within two months.
- Played a key role in delivering a user-centered solution, balancing functionality and user experience.
- Figma: https://bit.ly/figma-hackfest

Basic Challenge 2024 **May 2024 - Jul 2024**

UI/UX Competition - Finalist

- Collaborated with a team to create optimal UI/UX solutions.
- Was involved in the design process from exploring user needs to creating low-fidelity prototypes.
- Focused on improving the overall user experience.
- Figma: https://bit.ly/figma-sokrates

CCI The Hack 2024 **Jul 2024 - Oct 2024**

Front End Developer

- Acted as a Front-End Developer in a product-based competition, focusing on responsive web design.
- Developed a responsive and interactive interface that enhanced user engagement.
- Ensured optimal user experience by implementing best practices in front-end development.
- Successfully translated UI/UX designs into functional and visually appealing web applications.
- GitHub: https://github.com/bintangridwanp/tampilan-admin-myLaundry

Final Project Chevalier **Jan 2025 - Sep 2025**

Backend Developer

- Developed and optimized RESTful APIs to support core business logic and application features
- Built and maintained backend services with a focus on scalability, security, and high performance
- Integrated and managed third-party payment gateway services to handle secure online transactions
- Worked closely with frontend and UI/UX teams to ensure efficient API integration and data flow
- GitHub: https://github.com/bintangridwanp/telivery-be

IT Festival **Jun 2025 - Aug 2025**

UI/UX Competition

- Explored and analyzed user needs through Design Thinking methodologies to inform product decisions.
- Formulated product strategies and presented data-driven solutions to solve core problems.
- Collaborated in a team environment to successfully develop an innovative mobile platform within three months.
- Designed and iterated low-fidelity (wireframes) and high-fidelity prototypes to validate concepts and enhance usability.
- Ensured a user-centered design approach, balancing functionality, usability, and overall user experience.
- Figma: https://bit.ly/figma-equilife

Intern Project ASE Laboratory **Jun 2025 - Oct 2025**

Backend Developer

- Designed and developed RESTful APIs to support core application features.
- Implemented and maintained backend services, ensuring performance, security, and scalability.
- Created clear and well-structured API documentation to support front-end integration and team collaboration.
- Collaborated with front-end and UI/UX teams to ensure seamless data exchange and system integration.
- Optimized database queries and backend logic to improve response time and system efficiency.
- Integrated Optical Character Recognition (OCR) technology to extract and process text data from images, improving automation and data accuracy.
- GitHub: https://github.com/YuPayy/Yupay-BackEnd

Web Management PMI Nganjuk **Oct 2025 - Jan 2026**

Backend Developer

- Built and maintained backend services with a focus on scalability, performance, and security.
- Designed ERD (Entity-Relationship Diagrams) using Lucidchart to define and structure relational databases.
- Collaborated with front-end and UI/UX teams to ensure seamless data exchange and system integration.

Web Management GYM **Sep 2025 - Jan 2026**

Front End Developer

- Participated as a Front-End Developer in a product-based competition, delivering responsive and user-friendly web applications within a 3-month development period.
- Built interactive and responsive interfaces that improved user engagement and accessibility.
- Implemented front-end best practices, ensuring performance optimization and cross-device compatibility.
- Collaborated with UI/UX designers to transform design concepts into fully functional and visually appealing. applications
- GitHub: https://github.com/KolegaProject/chain_fit_web

Education

Telkom University **Sept 2023 – Present**

S.Tr.Kom, Software Engineering Technology *Bandung, ID*

- GPA: 3.46/4.00 from a total of 105 credits.
- Developed and completed over 3 front-end projects, over 5 back-end projects, and over 5 UI/UX design projects, covering web application development, RESTful APIs, and responsive UI design.
- Has a strong foundation in Data Structures, Algorithms, and Database Modeling.
- Experienced in implementing the Software Development Life Cycle (SDLC) and Agile methodologies (Scrum) in project workflows.

Certifications

- Competition finalist UI/UX by Surabaya Dev. (2024)
- Participant in Hackfest 2024 by GDSC Indonesia. (2024)
- Competition finalist UI/UX by Basic sibinus. (2024)
- Software Engineering by MySkill. (2024)
- Cloud Practitioner Essentials (Belajar Dasar AWS Cloud) by Dicoding. (2024)
- HTML CSS & JavaScript pemula sampai mahir by Udemy Programmer Zaman Now. (2024)
- Belajar Dasar Pemrograman JavaScript by Dicoding. (2024)
- Belajar Dasar AI by Dicoding. (2024)
- Alibaba Cloud Sertifikat by Alibaba Cloud. (2024)
- Bootcamp Intro to Data Analytics by RevoU. (2024)
- Memulai Dasar Pemrograman untuk Menjadi Pengembang Software by Dicoding. (2023)
- Git dan Github by Dicoding. (2023)
- Belajar SQL by Dicoding. (2023)
- Belajar Dasar Pemrograman Web by Dicoding. (2023)
- Git Dasar Sampai Mahir by Udemy Programmer Zaman Now. (2023)
- Belajar Membuat Front-End Web untuk Pemula by Dicoding. (2023)
- Coding bootcamp HTML & CSS by Prograte. (2022)

Organizations

Google Developer Student Club - Telkom University **Dec 2023 - Oct 2024**

Mobile & Web Development Student

- GDSC Telkom University is a student community focused on collaboration and innovation in technology. This organization is directly supported by Google to help students develop impactful solutions.
- Participated in 5 technology workshops aimed at improving soft and hard skills as a member of GDSC Telkom University.
- Collaborated as a Hustler in the development of the mobile platform Thrift Cycle, from exploring user needs using a

design thinking approach to designing the UI at HackFest 2024.

Central Computer Improvement - Telkom University **Nov 2023 - Dec 2024**
Web Development Division

- Central Computer Improvement is a community focused on collaboration and innovation in software development. This organization is under the auspices of Telkom University, aiming to help students create impactful solutions.
- Participated in a weekly study group for 4 months, following a curriculum focused on web development.
- Participated in more than 5 seminars and webinars aimed at developing soft and hard skills.
- Worked on projects and tasks to build a product from scratch to deployment-ready within 5 months.

Chevalier Laboratory SAS - Telkom University **Nov 2024 - Dec 2025**
C-Learn of Backend Division

- Participated in a backend-focused development program within a collaborative and innovation-driven community.
- Completed 12+ structured learning sessions (offline & online) covering backend systems and web development practices.
- Contributed to team-based development of a large-scale project, building a product from initial concept to deployment-ready.
- Solved real-world case studies and assignments to strengthen analytical thinking and backend development skills.
- Actively engaged in seminars and technical events to expand both hard and soft skills.
- Collaborated in a team environment, improving communication, teamwork, and project execution.

Advanced Software Engineering Laboratory - Telkom University **Jun 2025 - Nov 2025**
Backend Developer Intern

- Participated in an intensive software engineering program focused on backend development and real-world problem solving
- Completed 8+ online learning sessions covering backend systems, web development, and software engineering practices
- Solved real-world case studies through hands-on project development over a 5-month learning cycle
- Built and developed a product from scratch to deployment-ready, applying scalable backend architecture and best practices
- Delivered a final project presentation, showcasing technical solutions and system design based on given case studies
- Actively joined study groups, seminars, and webinars to strengthen both technical expertise and professional skills.
